

## Secure WhatsApp Alternatives - Requirements and Benefits for Healthcare Companies

### Pitch

Date	Time	Location
April 9, 2019	16:00 - 16:10	_Hub 2, Hall 2.2

- WhatsApp is widely used as part of shadow IT in healthcare companies. This raises numerous data protection and security issues.
- Secure messaging apps for healthcare companies are a suitable alternative. We show you which functions in the healthcare sector are particularly important and what users value.
- Comprehensive data protection, security, administration and compliance are important requirements for healthcare companies. We explain how a messaging app meets all these requirements.
- There are more and more applications for a secure messaging app in healthcare companies. We present innovative functions for alerting, connections to EHR and IOT integrations.
